Top Products for Soothing Baby During Flu Season

BY: MARIKATE WILSON

What to do when baby is sick, or suffers from respiratory infections? Seasonal allergies and germs can be picked up from daycare and school age siblings. According to the CDC, flu activity commonly peaks between December and February. However, seasonal flu activity can begin as early as October and continue into late May. And depending on what region you live in, the seasonal changes can affect baby year-round!

So, what are parents looking for on store shelves to soothe baby during this time of the year?

Products for Soothing Baby During Cold and Flu Season:

1. Humidifiers - These provide relief for a cold and flu and can increase air moisture. Use a cool mist humidifier for easier breathing and a good night's sleep. Humidifiers are also a great remedy for allergy or asthma sufferers.

The Duffy & Shanley, Motorola Smart Nursery Humidifier + helps baby breathe easy and sleep soundly. This connected humidifier can be controlled with the Hubble app for smartphones, tablets, and computers. It increases the moisture in a baby's nursery with four levels of cool mist di union with three programmable intervals.

2. Bottle Medicine Dispenser

– One of the best ways to ensure that your child gets the right amount of medicine is to use the right tool. These devices provide an easy way to give medicine in a familiar way, and are specifically designed to help

you measure and administer the right dose. To use just remove the top, fill to desired dosage and snap the top back on. It's as easy as 1-2-3.

Stephan Baby Mini Medicine Bottles hold up to 3tsp of baby's liquid medicine with no spill, and therefore no wasted medicine. The bottles are great for parents and babies on the go. They are ideal for mixing with juice or formula, and best of all the bottles are dishwasher safe.

3. Baby Bottle Sanitizers – Sanitizing is so important to every parent, especially because baby immune systems are so delicate. Germs are everywhere and keeping baby safe can seem like a confusing juggling act. Parents want to do everything possible to ensure that baby's developing immune system has adequate time to become as strong and resilient as it can be.

Raising the bar on baby bottle electric sterilizer products, UviCube is the newest and easiest way to keep the things baby loves away from germs. It is the first of its kind in the U.S. market, to dry, store and eliminate 99.9% of bacteria on surfaces exposed to UV light on items such as baby bottles, bottle nipples and pacifiers, but can also sanitize electronics, mobile phones, toys and other items.●
